Introduction

This report provides statistics, facts and market data related to e-commerce in Iran. The data has been provided by **ECM (E-Commerce Monitor)** with statistics conducted by the Central Bank of Iran in the spring of 2016. The following report is exclusively distributed through TechRasa.com.

TechRasa's task is to expose the activities of Iran's startup ecosystem with the vision of empowering and inspiring Iranian entrepreneurs. TechRasa aims to give startups the international exposure they need and to help promote Iranian entrepreneurs to become global stakeholders.

The months and the years in this report are all associated with the Iranian calendar since the data from the Central Bank of Iran was suited for the domestic use. The months in this reports start from spring as the Persian year usually starts on March 21st. To find out more about the Persian calendar please refer to [this article](#).

- Note that the financial figures in this report are in USD, converted from Iranian Rial. The exchange rate used is 34,500 IRR for 1 USD.
- Definition of “internet payment gateways with transaction” in page 4: Any gateway that makes online payments possible without the need of a physical card. These gateways had at least one transaction during the period of study.
